DETAILED ACTION

Response to Amendment

1. The amendment filed on 5/24/2004 has been entered.

Drawings

2. The drawings for figures 1 and 2 were received on 5/24/2004. These drawings for figures 1 and 2 are acceptable.

Response to Arguments

3. The amendments made to claims 37 and 74 overcomes the rejection based upon applicants admission of the prior art.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claims 37 and 74-82 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Art Unit: 2672

Claims 37 and 74-82

The amendments made to claims 37 and 74 are not supported by the originally filed specification. The system described on page 9 first paragraph described snapping the clipping path to the pixel grid of the output device before the processed content of the tile is output. Claims 37 and 74 now claim providing each tile including only pixels of the output device space that are wholly within the tile and then supplying a clipping path corresponding to the boundary of each tile. The specification described tiles that had overlapping pixels, supplying a clipping path that corresponded to the boundary of each tile, then snapping the clipping path to the pixel grid so whole pixels will be within each tile defined by the clipping path. The amended claims claim tiles with whole pixels and then supplying a clipping path to the tile boundary. Clearly the claim does not follow the originally filed specification.

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be

calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
